

Vehicle Specific Aftermarket LED Lighting

Heavy Duty Lighting carries the most comprehensive line of vehicle specific aftermarket LED lighting in the industry. Our vehicle specific lights are designed as direct replacement, plug-n-play parts, where unique factory connectors are used on the vehicle harness side. HDL's designs will not require cutting or splicing and therefore disrupting the integrity of the factory harness or possible vehicle warranty.

Through reverse-engineering, we will not only improve any original weaknesses the OEM part may have, such as water intrusion or premature failure, but we will also create an aftermarket light that will cost significantly less than the OE part, without compromising quality.

For more information on our complete vehicle specific product line contact us directly at sales@hdlighting.com or reach out to an HDL sales representative in your area.

PART NO	DESCRIPTION	OE CROSS REFERENCE	ORDER QTY
HD63015YCSD-2CB	Freightliner® 2-Wire Teardrop Side Turn Marker w/Chrome Bezel Clear	GNI-9700-000
